	Version		Description
SIMSSCR-605	7.11.205	Installers	In response to Microsoft's policy of ending support for operating systems more than 10 years old, we can no longer support SIMS on Wildnows XP or Wildnows Server 2003 / 2003 R2. The database requires SQL Server 2003 with Service Pack 4 to be installed at a minimum. This change is due to the SQL Server Data Tools component requirements, the Microsoft product lifecycle, and because these operating systems will no longer receive necessary security updates. SIMS version 7.10.46 will run on Wildnows Server 2003/R2; however, note that Windows Server 2003/R2 support ended in 2010 and extended support ends in July 2015. The SIMS v7.11.205 installers are verifying the minimum requirements and will stop before making any changes to the existing installation.
SIMSSCR-2609	7.11.205	Installers	Client, server, and standalone installers now use the NGEN utility to improve overall performance.
SIMSSCR-1519	7.11.205	Installers	The server and standalone install component responsible for upgrading the SQL Server database has been changed to SQL Server Data Tools. This avoids an issue that occurred in the v7.11.102 upgrade where users could have to pull data from the automatic backup taken during the upgrade
SIMSSCR-2592	7.11.205	Common	The client and standalone applications display a splash screen during program startup. During the login process, another dialog is displayed to indicate the time remaining before SIMS is ready to use.
SIMSSCR-2593	7.11.205	Common	Repeatedly clicking on a module page up/down arrow waiting for the server to respond will no longer generate an exception.
SIMSSCR-2620	7.11.205	Common	Improved the time to save records, especially in the Keys, Locks, and Visit Authorization modules.
SIMSSCR-2656	7.11.205	Contracts	Fixed validation error message for Contract Storage Level may not exceed Facility Level.
SIMSSCR-2686 SIMSSCR-2703	7.11.205 7.11.205	Conferences Documents	Fixed an issue when a conference attendee does not invoke a Special Access validation.  Corrected an issue that caused no data to display on the Document transaction metrics report.
SIMSSCR-2704	7.11.205	Documents	Fixed an issue when a new document record has a default Document Stream and the user selects
			the Stream button and selects the same stream, the counter is incremented instead of staying the same.
SIMSSCR-2547	7.11.205	DoD Requests	Fixed DoD Request Advanced Quick Find errors that occurred with Contract ID and Department.
SIMSSCR-2685 SIMSSCR-2511 SIMSSCR-2694	7.11.205 7.11.205 7.11.205	Facilities Incidents Locks & Keys	Corrected an issue that occurred when a Host Facility Internal Inspection Excel file is imported for all three checklists. It was due to a column header name change. The IncidentSubject ID from the Report Log in incidents is not being pulled in Quick Reports. Fixed how the lock copy and edit feature handles transaction history before and after saving the record.
SIMSSCR-2507	7.11.205	Personnel, Utilities	User option, "Allow modifications to Personnel Primary Clearance" setting will now overide the Data Group Filtering Personnel tab restriction setting for the user.
SIMSSCR-2521	7.11.205	Personnel	Updated fields in Quick Reports and in the Query Editor, added validation of Personal E-mail
SIMSSCR-2576	7.11.205	Visitors	address.  Added a Badge Print Preview button to the Visitor Check in Transaction screen.
SIMSSCR-2689	7.11.205	Visitors, Visit Authorizations	Visitor Check In T-Badge option will check for required fields set in the Advanced Data Field Defaults VisitorVisits table.
SIMSSCR-2684	7.11.205	Visitors, Visit	Corrected various Advanced Data Field Default validations and fields related to Incoming Visit
SIMSSCR-2698	7.11.205	Authorizations Web	Request web pages.  Changed System Customization Incoming Visitors Web Authentication choice of "LDAP only" to
SIMSSCR-864	7.11.205	Workflow Service	"SIMS User and LDAP" to more accurately describe how it is used.
SIMISSER GOV	7.11.203	TOTALION SCIVICE	in CustomEmails.
SIMSSCR-1992	7.11.102	Common	Upgraded to .NET Framework 4.0 for improved functionality and performance.
SIMSSCR-1679	7.11.102	Common	Set the maximum length of textbox controls in SIMS to not exceed the length of the corresponding column in the database.
SIMSSCR-1891	7.11.102	Common	Added an option in User Management to allow a user access to the DB Audit Trail in all modules. This is for non-managers.
SIMSSCR-1961 SIMSSCR-577	7.11.102 7.11.102	Common	Added a System Customization option to present a blank output list when a module opens.  Replaced all instances of @@IDENTITY in Stored Procedures with SCOPE_IDENTITY().
SIMSSCR-1865	7.11.102	Conferences	Added an option to Conference validations to "Allow visitors without a Visit Authorization if the conference classification rank is less than or equal to values". This is to allow visitors to attend a unclassified conference when they do not have a visit authorization.
SIMSSCR-1798 SIMSSCR-1836	7.11.102 7.11.102	Containers Containers	Added a Location Detail field to Containers.  Added an Alarm Test tab and fields to capture alarm tests.
SIMSSCR-1885	7.11.102	Containers	Added a Contract field to track which contract the container is for.
SIMSSCR-1586 SIMSSCR-1799	7.11.102 7.11.102	Contracts Contracts	Added a Points of Contact tab and listview to the Contracts module.  In the Contract module, DD 254 record, when the Archive checkbox is checked, the DD 254 is now
SIMSSCR-1826	7.11.102	Contracts	displayed in red on the DD 254 list view.  Added an enterprise wide option to Contracts pickers.
SIMSSCR-1827 SIMSSCR-1841	7.11.102 7.11.102	Contracts Contracts	Added a Category List Management field to the Home tab.  Converted Contract Sponsor field to a picker using the Personnel Sponsor list. Custom reports that
			use the Sponsor column will need to be edited to use the tmpContractSponsor column instead.
SIMSSCR-340 SIMSSCR-479	7.11.102 7.11.102	Documents Documents	Modified Document Transaction Receipt Return (external and internal) to run in a loop when doin Added a Document validation option for Loaned To personnel to have clearance brief date and no
SIMSSCR-1818 SIMSSCR-1839	7.11.102 7.11.102	Documents	Added a Responsible Person field to the Origin tab.  Added the ability to make a document accountable during a Document Regrade Transaction.
SIMSSCR-2066	7.11.102	Documents Documents	Added Responsible Person validations in the System Customization Document validations screen.
SIMSSCR-2371	7.11.102	Documents	Any custom reports that override the Document Count by Keyword will need to be rewritten.
SIMSSCR-2080 SIMSSCR-1615	7.11.102 7.11.102	DoD Requests  Facilities	Added additional Request DoD Output List fields to the RequestPersons list in Quick Reports.  Converted the Rating field into a List Management field in Cognizant Inspections for Host Facilities
SIMSSCR-2075			Added additional Facility Output List fields to the CogOfficeInspect list in Quick Reports.
SIMSSCR-2075 SIMSSCR-2095	7.11.102 7.11.102	Facilities Facilities	Added additional Facility Output List fields to the CogOfficeInspect list in Quick Reports.  Added Entry Points to Facility Addresses in Host and Other Facilities.
SIMSSCR-2109	7.11.102	Facilities	Added Cog Office Inspection Date to the Quick Find date search options in Host Facilities.
SIMSSCR-2447 SIMSSCR-1613	7.11.102 7.11.102	Facilities Facilities,	Corrected an issue when creating a new Facility with a Cog Office.  Added a Contact Type list management field to Facilities Points of Contact.
SIMSSCR-946	7.11.102	Personnel Facilities, Utilities	Expanded Advanced Data Field Defaults to include child tables. The Facilities data field defaults split into "Host" and "Other" Facility tables.
SIMSSCR-1817	7.11.102	Incidents	Increased the Incident Type field to 60 characters.
SIMSSCR-1819 SIMSSCR-1821	7.11.102 7.11.102	Incidents Incidents	Added a Description Summary field in the Description tab.  Added a Disciplinary Action field to the Subject list on the Home tab to track disciplinary action
SIMSSCR-1823	7.11.102	Incidents	taken. Added a Contract picker to Incidents Home tab.
SIMSSCR-1837	7.11.102	Incidents	Added a report log with a Subject picker to track incidents reported to customer and other entitie
SIMSSCR-1837 SIMSSCR-1840	7.11.102 7.11.102	Incidents	Added a Report log with a subject picker to track incidents reported to customer and other entrue  Added a Reporting Entity list management field to the home tab. Custom reports that use the  SelfReported column will need to be edited to use the tmpSelfReported column instead.

SIMSSCR-1820 7.11.102 Installers, Workflow Service Converted all installers to use InstallShield 2014. Workflow Service SIMSSCR-1820 7.11.102 IS Added a Category field to the Software record. SIMSSCR-1286	7.10.46	Component	Description  Corrected an issue in which a validation message "Existing Session Detected" would display,
			causing users with LDAP accounts to be locked out of SIMS. The workaround to update in SQL the session end date for the user ID locked out of SIMS is no longer needed.
SIMSSCR-1676	7.10.46	Common	SIMS Standalone installer now uses SQL Server 2008 R2 (32-bit) instead of SQL Server 2005.
SIMSSCR-1937 SIMSSCR-1339	7.10.46 7.10.46	Installers	Corrected web service installation issues that occurred on Windows 8, Windows 2008 R2 Server, and Windows Server 2012 which required supplement installation steps.  Added a Contact Name column in the Classified Contracts module on the Facility/Address Picker or
			the Government Agency tab.
SIMSSCR-412 SIMSSCR-637	7.10.46 7.10.46	Personnel Personnel	Added the Contract ID and Status columns to the Special Access tab in Personnel.  Corrected an issue when a Personnel record's Primary Clearance is changed to another clearance
Sivissell 037	7.10.40	reisonnei	(new or existing) and the Facility IDs are different, the Facility ID was not updating in the discrepancy report during a JPAS import transaction.
SIMSSCR-1078	7.10.46	Personnel	Added personal cell phone and personal e-mail fields to the Personnel Personal tab.
SIMSSCR-1085	7.10.46	Personnel	Added a check box to the Personnel Home tab to track Authorized Escorts.
SIMSSCR-1265 SIMSSCR-1442	7.10.46 7.10.46	Personnel Personnel	Added ability to display all Contracts (inactive and active) and not only active Contracts in the Contract Picker of Personnel Quick Find.  Added a "No Date Specified" checkbox and an 'Any Date Specified' checkbox to the Personnel module/Qu
			Find/Basic tab.
SIMSSCR-1539	7.10.46	Personnel	Fixed an issue with Personnel JPAS Import transaction displaying incorrect dates such that the following workaround is no longer needed: Open the .csv file with Notepad, and select Edit / Replace and put in find "0:00," replace with "," without the quotes. Do a Replace All, save and the
			re-try the import.
SIMSSCR-42 SIMSSCR-749	7.10.46 7.10.46	Visitors Visitors	Added 'Current Visit Count' and 'Maximum Visit Count' fields in the Visiting Data tab.  Corrected an issue when Visitor Check-In Transaction prints the Visitor Badge and a validation message
SIMSSCK-749	7.10.46	VISITORS	"Escort Required for Unclassified Visit" displays.
SIMSSCR-1811	7.10.46	Visitors	Added a feature to allow users with Read Only access to the Visitor module to create new visitor records using the 3M scanner.
SIMSSCR-1155	7.10.46	Visitors	Fixed an issue with the Visitor SA table not displaying all values associated with each visitor on the Output List and Quick Report.
SIMSSCR-1464	7.10.46	Visitors	If Badge information is populated in the selected Visitor record, the Badge information will now be displayed at Visitor Check In for save or edit.
SIMSSCR-1485	7.10.46	Visitors	When performing a Check Out Transaction in the Visitors module, searching for Badge Number field at times would not pull up visitor records. This issue has been corrected.
SIMSSCR-1182	7.10.46	Documents	Added a Signed for Date field for Document Internal Transfer Receipt Returned Transaction.
SIMSSCR-544	7.10.46	Conferences, Visit	Added Lobby Management user interface to approve Attendees and Visit Authorization Visitors.
SIMSSCR-322	7.10.46	Authorizations DoD Outgoing Requests	Added a Classification field on the OVR that will populate the Classification field on the Home tab of the DoD outgoing request.
SIMSSCR-1490	7.10.46	DoE Outgoing Requests	Fixed an issue in which all available visitors not limited to the visitors attached to a selected DoE record would display on the DoE Termination/Regrade report. This would happen if one DoE record was checker rather than highlighted in the output list screen.
SIMSSCR-385	7.10.46	Conferences	Added the ability to add a Special Access to a Conference and Meeting record and established validations
SIMSSCR-1749	7.10.46	Visitors, Visit	that require attendees to have the required Special Accesses to attend the meeting.  Corrected an issue that occurs when a space is added in the SSN field. (1) Don't allow an SSN comprised
		Authorizations	entirely of spaces; (2) Don't look up a Visitor ID or SSN unless the user has typed/pasted into the field that they are leaving; and (3) Don't look up a Visitor ID or SSN unless the value in the field has at least one nor space field.
SIMSSCR-1269	7.10.46	Visitors, Visit Authorizations	Corrected an issue when the SSN field in the Visitors table is set to 'Required' in Advanced Data Field Defaults, Visit Authorizations with Visitors that have valid SSN numbers are unable to be saved until each
SIMSSCR-43	7.10.46	Conferences,	attached visitor record is reopened and re-saved.  Added Lobby Management - E-mail Notification feature.
		DoD Requests, Utilities, Visit Authorizations, Visitors, Utilities,	Customers upgrading from SIMS v6 will need to install version 7.9.30, execute a custom SQL script, use th import Engine to migrate their data, and then upgrade SIMS to version 7.10.46 or newer.
SIMSSCR-44	7.10.46	Installers Utilities, Visitors	Added Lobby Management - Visitor Check-In user enhancements.
			The 'Badges Not Returned' report was modified to handle denied visitors (which did not exist in 7.9.30). be listed, the following must be true: (1) The visitor must have been admitted, and (2) The BadgeReturned value must be false. A visitor that is currently checked in still appears on the report. A visitor that checks in and checks out shows up (regardless of whether he/she was given a badge) if the
SIMSSCR-38	7.10.46	Conferences,	'Badge Not Returned' button is clicked when he/she checks out.  Added Lobby Management - Visitor Check-in web user interface.
		Utilities, Visit Authorizations,	
SIMSSCR-2030	7.10.46	Visitors, Web Utilities	When the Visitor table is selected in Advanced Data Field Defaults, a note is displayed to indicate that requiring a field that is not available in the "Fields to Show" list on the incoming Visitors tab of the System
SIMSSCR-683	7.10.46	Web	Customization utility will prevent visitors from being submitted via the web page.  Updated Personnel web service to include the Personnel Organization column.
SIMSSCR-1931	7.10.46	Web	Corrected an issue when passwords with "<", ">" followed by a letter displayed a .NET error when accessing SIMS through the web.
SIMSSCR-162	7.9.30	Personnel	Additional fields were added to the personnel foreign travel dialog for travel request number, pre travel brief date, debrief date, and a list management field for foreign travel type.
SIMSSCR-543	7.9.30	Personnel	Certain date fields exported from JPAS can appear in different formats such as YYYY MM DD or DD/MM/YYYY. SIMS now supports all the different date formats that could be exported from JPA
SIMSSCR-273	7.9.30	Personnel	When adding a batch of special accesses to a personnel record, a user can now specify a contract to be associated with the batch of special accesses being added.
SIMSSCR-629	7.9.30	Personnel	A new Contract picklist was added to the Personnel clearance module allowing contract numbers to be added to the supporting Clearance Case.
SIMSSCR-1279	7.9.30	Personnel	A new contract picklist was added to the Personnel clearance module in v7.8.40. Corrected an issue where a newly selected contract would not appear on the clearance record until the record
			was saved and reopened. This issue is not present in versions prior to v7.8.40 because that field had not yet been added to personnel clearances.
SIMSSCR-493	7.9.30	Personnel	In Utilities / Clearance Levels, each clearance level has a reinvestigation time period setting to dictate in the Personnel clearance case, how many days between investigations. Corrected an issi that occurred when a user enters 0 in the reinvestigation time period in days setting in Utilities/Clearance Levels and then performs the JPAS import, the clearance case reinvestigation notification date was populated with the information from the investigated date in the JPAS
SIMSSCR-540	7.9.30	Personnel	innort.  Corrected an issue that only occurred in rare cases. The Personnel Clearance Metrics report could generate an error. This error is data specific and was only reproducible by one customer.
SIMSSCR-1226	7.9.30	Personnel	Corrected a printing issue for the Key Management Personnel (KMP) report. When printing, if no values were specified for the initial or change report dates, the current date would display instead
SIMSSCR-154	7.9.30	Visitors	of a blank date value.  When entering a new visitor record, a user could populate the Visitor ID field, move to the next

SIMSSCR-809	7.9.30	Visitors	A new 30 character 'Vendor' text field was added to the Visitor module check-in transaction dialo and the Visit Occurrence dialog on the visitor input form. This field is intended to be used for checking in visitors where there is no need to add their company to the Other Facilities module.
SIMSSCR-808	7.9.30	Visitors	A new feature was added to control how the 'ID Type' list management value was populated whe a visitor is checked in using the 3M AT9000 document scanner. The default behavior is to use the generic format such as Passport, Drivers License, etc. This can be changed by modifying the <add key="ScannedIDType" value="General"&gt; to <add key="ScannedIDType" value="Specific"> in the SIMS.exe.config file. This change will record the more specific document type such as United Statt (USA) Passport and California (CA) Drivers License.</add></add 
SIMSSCR-1178	7.9.30	Visitors	An issue introduced in v7.8.16 was corrected. An exception could be generated when using the new 'Check in New Visitor' function to create a new visitor record at the time of check in.
SIMSSCR-1227	7.9.30	Visitors	Visitors with a 'from' date in the future are no longer permitted to be checked in by a guard using the check-in transaction.
SIMSSCR-1266	7.9.30	Visit Authorizations	Corrected an issue where the 'Filter Inactive' checkbox on the Visit Authorization output list was not filtering inactive records if the 'To Date' was the previous day. The record was still treated as inactive and shown in red, but it still appeared in the output list along with active records.
SIMSSCR-1255	7.9.30	Web	When using the DoD Outgoing Visit Request web page to submit records for approval, the selecte facility phone number would display the prefix incorrectly depending on the format of the phone number in the facility record. It would appear as (123)7890 instead of (123) 45-7890. While it displayed incorrectly on the web page which has been corrected, OVR reports did display the correct phone number regardless of the format.
SIMSSCR-1241	7.9.30	Utilities	The Database Audit Utility was incorrectly displaying data group headers when the report was ru in portrait mode and the personnel records involved had been updated from JPAS. A workarounc is to select the landscape format or run a SQL script to clear the PersonnelJPAS table. The correct
SIMSSCR-1207	7.9.30	Documents	data group headers now display.  A Utilities/List Management field was added for the new 'Classification Reason' field which is on the Status tab of the document module as required by E.O. 13526.
SIMSSCR-1198 SIMSSCR-99	7.9.30 7.9.30	Documents Documents	A new 'Declassify Event' field was added to the Status tab of the document module.  Corrected an issue where users were unable to generate document tracer letters for overdue
SIMSSCR-1230	7.9.30	Documents	receipts for documents transferred to a different data group.  Corrected an issue where the document audit trail record for the inventory transaction was not displaying the custodian name or ID information when performing a document barcode inventor
SIMSSCR-1150	7.9.30	Documents	by custodian.  The primary container custodian value has been added for use in custom reports.
SIMSSCR-464	7.9.30	Documents	When performing an Internal Transfer transaction in the Document module, the 'Signed For' date was not updating correctly if: (i) the 'Overdue Document Internal Transfer Receipt/Tracer' value is System Customization / Time Periods was set to 0, the signed for date was changed to the date treturn receipt was processed instead of retaining its original value, and (ii) if the 'OverDue Document Internal Transfer Receipt/Tracer' value in System Customization / Time Periods was a value greater than 0, the date would not display in the audit trail. This issue has been corrected and the date now correctly displays.
SIMSSCR-432	7.9.30	Documents	Users can now perform Return Receipt transactions regardless of data group membership if data group filtering is disabled. If the Data Group filters are disabled the user is now able to both externally transfer and return the receipt.
SIMSSCR-541	7.9.30	Contracts	The custom report designer was expanded to include DD254 data for use with custom contract
SIMSSCR-768	7.9.30	Contracts	module reports.  Several corrections were made to the DoD and NSA versions of the DD254 to make sure they
SIMSSCR-390	7.9.30	Contracts	forms matched exactly with the official government current versions.  Corrected an issue where users migrating from SIMS v6.12.1 to SIMS v7.6 or later could experien an exception when importing Contract records because of a new 'RevisedFlag' field that was add to v7.
SIMSSCR-1257	7.9.30	Contracts	When generating the Contracts by Facility report the facility clearance level and storage level values were blank. This issue was corrected and the values now correctly display.
SIMSSCR-1023	7.9.30	DoE Requests	Minor typographical errors were corrected on the DoE Request Detail Report - Request for Visit Access Approval'.
SIMSSCR-453	7.9.30	Common	Corrected an issue where non managers who are assigned to individual data groups are able to delete records in their hierarchical data group, but were unable to delete records in individual da groups. If a user has read/write access to a module and they are a member of that data group, they should be allowed to delete record unless the System Customization option is enabled to restrict records deletions to managers only.
SIMSSCR-1316	7.9.30	Workflow Service	
SIMSSCR-1133	7.8.37	Common	If a user is not assigned to a data group, they are not restricted to one or more data groups and can view all List Management items regardless of their data group assignment. That behavior is b design. When editing a record, the only List Management items displayed in the picklist are those not assigned to a data group. For consistency users not assigned to a data group can now select. List Management items from any data group. Note that if you're using data groups, the only user who should be logging in with no data group membership are those running reports and not changing records.
SIMSSCR-1106	7.8.37	Common	Due to NISPOM Conforming Change Number 1, the maximum length of a special access name wa increased from 20 to 32 characters to accommodate the new marking 'REL USA AND GBR TREAT
SIMSSCR-941	7.8.37	Common	COMMUNITY.  SIMS only allows one session at a time for each user account. If a second client logs in using an account that already has an active session, the first session will be terminated. SIMS will now was the second user that if they continue with the login process, the existing session will be terminate
SIMSSCR-1105	7.8.37	Documents	Due to NISPOM Conforming Change Number 1, two new fields were added to the 'Downgrade' section on the Status tab of document records. The first is a 'Classified By' personnel picklist, the second is a 'Classification Reason' list item. Personnel can only be selected for 'Classified By' if the personnel record has either 'Original Classifier' or 'Derivative Classifier' checked on the home tab Additionally, the Declassification Exemptions section was renamed 'Declassification Exemptions (Obsolete)'.
SIMSSCR-1107	7.8.37	Documents	A new document validation was added to require (U) to appear at the beginning of the documen title. This is in addition to the existing validation to require (U) to appear at the end of the document title. This new validation was added to comply with NISPOM Conforming Change Number 1.
SIMSSCR-290	7.8.37	Documents	Personnel ID is no longer required during a 'Return to Accountability' Transaction when the 'Document Return to Accountability New Custodian' box is checked in Basic Data Field Defaults.
SIMSSCR-377	7.8.37	Documents	Corrected and issue with spelling and verbiage on the error message for External Transfers Recei
SIMSSCR-438	7.8.37	Documents	Corrected an error that appeared in Document Transactions when loading a Scanset and changin
SIMSSCR-635	7.8.37	Documents	the transaction type.  Corrected an issue with External Transfer Receipt printing 'Sent by' instead of 'Authorized by'.
SIMSSCR-698	7.8.37	Documents	Corrected an issue that occurred when creating a new Document with 'Disable Custodian edit via transactions' setting enabled that did not allow you to populate custodian.
SIMSSCR-701	7.8.37	Documents	Corrected an issue with the Document Numbering Stream skipping numbers when set to default the user changed the default stream to another stream and then went back to the default stream.

	7.8.37	Component Documents	The prefix column width in the Document Stream utility was increased from 14 to 20 characters.
SIMSSCR-91	7.8.37	Documents	Corrected an issue that could cause poor performance while running the Document 'Load Scan Se transaction.
SIMSSCR-1058	7.8.37	Facilities	Due to NISPOM Conforming Change Number 1, the context sensitive NISPOM reference in Host Facilities / Internal Inspections / NISPOM Checklist has been updated to reflect the changes to the NISPOM and now includes ISL 2013-01, ISL 2013-02, and ISL 2013-03.
SIMSSCR-362 SIMSSCR-789	7.8.37 7.8.37	Facilities Facilities	Error occurs when searching for Performing Contract ID in Host and Other Facilities.  Other Facilities detail report shows default text 'Position' when no position is provided for point contact.
SIMSSCR-761 SIMSSCR-604	7.8.37 7.8.37	Facilities Personnel	Corrected an exception in self-inspections when selecting Inspected By personnel.  Added two new fields to the Employment tab of the personnel module: Active Directory User
SIMSSCR-1104	7.8.37	Personnel	Name and EDIPN. These fields appear on the personnel detail report but will not appear on the read-only web pages since they may be considered sensitive information.  Due to NISPOM Conforming Change Number 1, two new fields were added to the Home tab of th
			personnel module to identify those authorized to be listed as 'Classified By' on document records Original Classifier and Derivative Classifier.
SIMSSCR-302 SIMSSCR-364	7.8.37 7.8.37	Personnel Personnel	The JPAS import no longer adding audit trail entries to the remarks tab in personnel.  Billet number tally now correctly behaving in Personnel Special Accesses.
SIMSSCR-372	7.8.37	Personnel	Unhandled exception no longer occurs if 1) SA not selected and 2) billet count exceeded.
SIMSSCR-641	7.8.37	Personnel	Error no longer appears when attempting to query on Clearance Case Investigator.
SIMSSCR-740	7.8.37 7.8.37	Personnel Personnel	Personnel detail report no longer displays incorrect data for SCI subreport. Add access to the PersonnelForeignContacts and PersonnelForeignContactDates tables for custor reports.
SIMSSCR-514 SIMSSCR-568	7.8.37 7.8.37	Visitors Visitors	Corrected issue with Visitor Badge not printing from Visitor Module.  Corrected spelling error in Advanced Search dialog, 'Convience'.
SIMSSCR-576	7.8.37	Visitors	Visitor Check In dialog no longer displays 1/1/1754 if no date is specified.
SIMSSCR-590 SIMSSCR-611	7.8.37 7.8.37	Visitors Visitors	Corrected Visitor Check In Advanced Search issues.  Corrected an issue that caused an exception to occur when a Clearance Verify Method is selected
SIMSSCR-618	7.8.37	Visitors	during the Visitor Check In Transaction.  Added the ability for users to store ID data in specific fields returned by AssureID and 3M AT9000
SIMSSCR-648	7.8.37	Visitors	scanner in VisitorVisits.  Error no longer occurs when SIMS user not assigned to a Data Group attempts to create a new
SIMSSCR-667	7.8.37	Visitors	Visitor record using the 3M AT9000 scanner.  Issue with visitors output list title bar text not reset when input window closes has been corrected.
SIMSSCR-669	7.8.37	Visitors	Exception using Query Editor on VisitorVisits Building_Location_ID has been corrected.
SIMSSCR-760	7.8.37	Visitors	Auto-numbering has been expanded to include the Badge Number which allows users to specify auto numbering values for the Badge Number issued during the visitor check-in process.
SIMSSCR-616	7.8.37	Common	Error no longer occurs when creating a user account with a Login ID containing an apostrophe.
SIMSSCR-695	7.8.37	Common	Corrected Quick Report issue - Delimiter dialog gives error - [MESSAGE0]: Value of '0' is not valid for 'Value'. 'Value' should be between 'Minimum' and 'Maximum'.
SIMSSCR-194	7.8.37	DoD Requests	Requests.DoD.MainForm.GetRecords Table: RequestDoDArchive - Column 'RequestDoDRecordType ID' now allows DBNull.Value.
SIMSSCR-617	7.8.37	DoD Requests	DoD Visitor Input Form no longer displays database Special Access values that will not appear on the request because they are debriefed or not briefed and a briefing is required.
SIMSSCR-622	7.8.37	DoD Requests	The 'Address' label on the Facility Address Input Screen no longer appears truncated on some workstations.
SIMSSCR-1120	7.8.37	DoE Requests	for 'Disable Sending Facility When JPAS Checkbox Enabled'. If this is checked, when a user attempt to submit a request through the OVR web interface they will receive a message stating that the FA #is required but the field is disabled. A workaround is to turn off that setting in System Customization. This field is no longer required when that option is enabled in System Customization.  When generating a termination letter in the DoE module and selecting the option to select individual visitors, and not all visitors were selected, the termination letter printed correctly but if added a termination date for all visitors on the request instead of only those appearing on the termination letter. This only affected the DoE module, not the DoD module. This issue has been
SIMSSCR-664	7.8.37	Containers	corrected.
SIMSSCR-1127	7.8.37	Contracts	Corrected an issue with the Phone number overflowing into empty records.  Corrected a printing issue with the Contracts by Facility List report. The Government Contracting Agency (GCA) information was not consistently printing the facility name and the Facility Address Contact Email Address and GCA POC Title were appearing in the wrong order.
SIMSSCR-518	7.8.37	Contracts	Corrected an error that occurred when printing the DD254 if section 12 did not contain information.
SIMSSCR-768	7.8.37	Contracts	Corrected an error on the printed copy of the DD254. "Typed Name of Certifying Offical" was spelled incorrectly.
SIMSSCR-801	7.8.37	Contracts	Corrected an issue where the DD254 tab retrieving incorrect address for Subcontractor facility record if the DD254 is created before the contract record is saved for the first time.
SIMSSCR-858	7.8.37 7.8.37	Cog Offices IS	The phone, fax, and address fields have been expanded to allow 45 characters.  Corrected the IS detail report so Custodian ID, Name, System Specific and ISSO values no longer
CINACCOD CCC		13	overflow into empty records.
SIMSSCR-666	7 0 27	\/ici+	Removed the validation message regarding an invalid SSN format that appeared when the SSN we
SIMSSCR-925	7.8.37	Visit Authorizations Forms	a valid format.
	7.8.37 7.8.37 7.8.16		a valid format.  Corrected a spelling error in the Forms module on the PAR input form, on tab 26-30.  Expanded the Host Facility module Internal Inspections to support JAFAN and collateral self-inspection forms. NISPOM and JAFAN self-inspection forms can be customized, imported from an exported to Microsoft Excel, and contain hyperlinks matching each question to the appropriate
SIMSSCR-925 SIMSSCR-1108 SIMSSCR-27	7.8.37	Authorizations Forms Host Facilities	a valid format.  Corrected a spelling error in the Forms module on the PAR input form, on tab 26-30.  Expanded the Host Facility module Internal Inspections to support JAFAN and collateral self-inspection forms. NISPOM and JAFAN self-inspection forms can be customized, imported from an exported to Microsoft Excel, and contain hyperlinks matching each question to the appropriate section of the documentation.
SIMSSCR-925 SIMSSCR-1108	7.8.37	Authorizations Forms Host Facilities Visitors Conference &	a valid format.  Corrected a spelling error in the Forms module on the PAR input form, on tab 26-30.  Expanded the Host Facility module Internal Inspections to support JAFAN and collateral self-inspection forms. NISPOM and JAFAN self-inspection forms can be customized, imported from an exported to Microsoft Excel, and contain hyperlinks matching each question to the appropriate section of the documentation.  Users with the 3M AT9000 document scanner can now create new visitor records in the check-in dialog. Data is automatically populated from the information on the visitor's ID.  When adding visitor or personnel records to the Attendees tab in the Conference & Meetings
SIMSSCR-925 SIMSSCR-1108 SIMSSCR-27	7.8.37 7.8.16	Authorizations Forms  Host Facilities  Visitors  Conference & Meetings  Conference & Conference	a valid format.  Corrected a spelling error in the Forms module on the PAR input form, on tab 26-30.  Expanded the Host Facility module Internal Inspections to support JAFAN and collateral self-inspection forms. NISPOM and JAFAN self-inspection forms can be customized, imported from an exported to Microsoft Excel, and contain hyperlinks matching each question to the appropriate section of the documentation.  Users with the 3M AT9000 document scanner can now create new visitor records in the check-in dialog. Data is automatically populated from the information on the visitor's ID.  When adding visitor or personnel records to the Attendees tab in the Conference & Meetings module, the picklists now support checkboxes allowing multiple records to be selected at one tim  The Conference picklist now displays the from and to dates, and contains new search fields for

SIMSSCR-212	7.8.16	Component Conference & Meetings	Description  Expanded support for retrieving related tables by custom reports in the Conference & Meetings module.
SIMSSCR-264	7.8.16	Meetings Documents	The Document module Destruction Certificate transaction receipt was rewritten to better support
SIMSSCR-267	7.8.16	Personnel	custom reports.  Increased the size of the Personnel Position list field from 30 to 50 characters.
SIMSSCR-226	7.8.16	Documents	The Load ScanSet / Make ScanSet transaction menu item in the Documents module has been split into two menu items. Instead of taking the user to the standard transaction dialog, the user can
			save or load the records in the outputlist using a text file.
SIMSSCR-224	7.8.16	Documents	Added a new AllSAs column to the Documents module that displays all Document Special Accesse in the output list.
SIMSSCR-169	7.8.16	Web	Users with an expired password could still login to the read-only web interface if the system was
SIMSSCR-564	7.8.16	Visitors	not using Active Directory or LDAP for authentication.  Corrected an issue in v7.7.59 where the clearance, special access, and citizenship fields were not
			visible on the check-in transaction dialog.
SIMSSCR-419	7.8.16	Documents	Corrected an issue in v7.7.58 that generated an error when a user inputs a Document record Document Control Number and then selects a Document Stream.
SIMSSCR-158	7.7.59	Visitors	The Visitor Check-in Transaction now supports the 3M AT9000 document scanner and AssureID
			document verification software. This allows guards to scan 2,500 different types of documents (drivers licenses, passports, military IDs) and determine if the document is authentic. This also
			speeds up the check-in process by using OCR to automatically search for valid visit records as soc
SIMSSCR-342	7.7.59	Danasasi	as the ID is placed on the scanner.
SIIVISSCN*S42	7.7.33	Personnel	Some records exported from JPAS can now contain string values such as 'N/A' in fields that previously contained only date values. This could cause an error to appear when performing the
SIMSSCR-293	7.7.59		JPAS import transaction.
SIMSSCK-293	7.7.59	Common	All 3rd party DLLs included in the ClickOnce client are now digitally signed in order to support restricted environments that require DIACAP approval.
SIMSSCR-22	7.7.59	Common	Added alternative licensing to the standalone version for customers without USB ports. By defau
			a FIPS 140 compliant hashing algorithm will be used unless the workstation is running Windows X If running Windows XP, a non-FIPS compliant algorithm is used. Note that Microsoft ended
			mainstream support for Windows XP on 04/14/2009 and will end extended support on
			08/04/2014. SIMS will continue to support XP workstations as long as possible.
SIMSSCR-359	7.7.59	Common	Users upgrading from v7.5 and earlier could receive an error running the standalone and server
			installers regarding a missing constraint (FK_VisitorVisits_ClearanceVerifyMethod).
SIMSSCR-266	7.7.59	Common	The components used for the Quick Reports Label Wizard, Task Scheduler utility, and JPAS Impor Wizard has been upgraded to provide better support for Windows 8 workstations.
			wizard has been upgraded to provide better support for windows a workstations.
SIMSSCR-251	7.7.59	Documents	The document numbering stream option to start copy numbers at 0 instead of 1 was not working correctly when 'Use Copy Format for Originals' was enabled. The copy numbers always started a
			which was the same as the original document number.
SIMSSCR-199	7.7.59	Documents	The 'Disposition' field was removed from the document summary report because it duplicated th
			information already appearing in the 'Status' column.
SIMSSCR-339	7.7.59	Facilities	When the option 'Require Unique Facility ID by Data Group for Records Above This Rank' is enabled, and a duplicate record is created through the copy process, the message appeared in an
			error dialog instead of a regular validation dialog.
SIMSSCR-135	7.7.59	DoD Requests	An updated control used to format phone number input on the DoD request OVR web page did n
SIMSSCR-192	7.7.59	Personnel	work on older Windows XP workstations.  Added a new Personnel Badge Type list to the List Management utility.
SIMSSCR-132	7.7.59	Common	Corrected an issue in Advanced Data Field Defaults that could prevent users from specifying a
SINISSEN 330	7.7.55	Common	default facility value for personnel special access records.
SIMSSCR-353	7.7.59	Conferences	When editing the from/to dates on the conference home tab, if the only change is made to the
			from or to date, and the user clicks the navigation button to move to another record, the user is not prompted to save their changes. Changes are saved if the user clicks the OK button instead, o
			if any other field in addition to the from/to dates are changed.
SIMSSCR-45	7.7.59	Personnel	In rare cases, users could receive an error indicating "Column" does not belong to table ClearanceVerifyMethod" when saving personnel records.
SIMSSCR-324	7.7.59	Containers	Expanded the tables available to custom reports in the Container module to allow inclusion of
			personnel training records for container custodians.
SIMSSCR-100	7.7.31	Personnel	SIMS Client and SIMS Standalone now support running in native mode on both 32-bit and 64-bit
SINISSCIT-100	7.7.51	rersonner	operating systems. This provides increased performance for clients running on 64-bit operating
			systems. Additionally, ClickOnce clients no longer receive an error message when performing a JPAS import on a 64-bit operating system.
SIMSSCR-115	7.7.31	Common	The digital certificates used to sign the SIMS program and ClickOnce packages for v7.6 and earlier
			expires on 7/9/2012. The certificate has been renewed through 2015. This change primarily
			impacts ClickOnce users. When new users attempt to install the ClickOnce client for v7.6 and earlier, they may receive a warning that the publisher's certificate has expired.
SIMSSCR-112	7.7.31	Documents	Users can now open other modules while performing a document transaction without closing the
			transaction and starting over. Additionally, when a validation error occurs during a transaction, t
SIMSSCR-102	7.7.31	Documents	user is no longer returned to the outputlist by default.  Performing an internal transfer, or reprinting an existing internal transfer receipt, will now
SINISSCIT-102	7.7.51	Documents	generate multiple receipts when multiple custodians were assigned to the documents. Each recei
SIMSSCR-69	7.7.31	Common	will only display the documents previously assigned to a particular custodian.  Added support for SQL Server 2012.
SIMSSCR-142	7.7.31	Locks & Keys	Improved transaction performance for Locks and Keys modules.
SIMSSCR-113	7.7.31	Personnel	The personnel detail and termination reports have been rewriten to use less space, and allow the user the print time option of selecting which subreports to include. NOTE: Users running
			customized versions of these reports should contact SIMS Support prior to upgrading.
CIMCCCD 103	7.7.31	Documents &	Added support for the Topaz T-S460 (and related models) of electronic signature pads to capture
SIMSSCR-103	7.7.31	Keys	signatures during document internal transfer transactions and key assignment transactions.
CIMCCCD 120	7.7.31		
SIMSSCR-138 SIMSSCR-39	7.7.31	Contracts Documents	Added a Contracts Listing Report to the Contract module to assist with DSS inspections.  Added a Document Transaction Metrics to generate a count, by month, of document transaction
CILARCEON AN	7774		grouped by classification level.
SIMSSCR-49	7.7.31	Documents	When performing a document destruction transaction the user has the option to clear the custodian and container values. If those custodian or container records are deleted from SIMS, a
			a user performs an undestroy transaction on one of those documents, an error will be generated
			when the undestroyed document is assigned to the container or custodian that no longer exists.
SIMSSCR-63	7.7.31	DoD Requests	DoD visit requests using the naval messaging option now have the ability to send the report via e
SIMSSCR-72	7.7.31	Visitors	mail.  When adding new visitors to a visit authorization record, the point of contact information from t
			visit authorization was not always appearing on the visitor record input form.
	7.7.31	Visitors	When selecting the 'Badge Returned' button on the Visitor module Check-Out dialog, certain
SIMSSCR-82			visitors could cause the operation to take an extremely long time to complete
	7.7.31	Personnel	visitors could cause the operation to take an extremely long time to complete.  The JPAS tab in the personnel module could show a 'tast Modified Date' of '1/1/1754' if no date
SIMSSCR-82		Personnel Documents	

Ticket SIMSSCR-129	7.7.31	Documents Documents	Description The document numbering stream setting "Save Counter When Document Number Modified" was not always saving the old document number when a user modified it prior to saving the record.
SIMSSCR-130	7.7.31	Common	When a module contains more than 10,000 records, and record paging is enabled, the sort order on the outputlist was not always accurate due to a bug in how SQL Server calculated sequence
SIMSSCR-134	7.7.31	Visitors	numbers.  Corrected an exception when performing a Query Editor search in the Visitors module on the
SIMSSCR-137	7.7.31	Personnel	facility name of the VisitorVisits.From_FacilityAddress_ID field.  Performing a personnel clearance metrics summary report can generate an exception in rare case
SIMSSCR-139	7.7.31	DoE Requests	An exception window may appear prior to displaying the report preview window when performing
SIMSSCR-135	7.7.31	OVR Web	a Termination and Regrade report in the DoE module.  The date controls used to validate phone number formats on the OVR input web pages have beer replaced with a more modern component. The previous component was preventing the Sims. Web. dll file from being digitally signed.
SIMSSCR-141	7.7.31	Utilities	Date fields set to 'Current Date' in the Advanced Data Field Defaults utility could show an actual date value instead of 'Current Date' if other values are set for that field in different data groups. However, the correct date is used when creating records. This is a display issue only restricted to the utility module.
SIMSSCR-101	7.7.31	Visit Authorizations	Performing a Quick Find for visitors by first and last name from the Visit Authorization module w performing an 'OR' operation when the query specified 'AND'.
SIMSSCR-22	7.7.31	Common	An alternative licensing scheme for customers who cannot provide an IP address or FQDN is now available. NOTE: Users who received these alternative licenses prior to v7.7.21 will need to obtain an updated license from SIMS Support prior to upgrading as the hash function used to generate t licenses changed between v7.6.24 and v7.7.29.
SIMSSCR-26	7.7.31	Common	An alternative licensing scheme for standalone customers who cannot use a USB key is now available. NOTE: Users who received these alternative licenses prior to v7.7.21 will need to obtai an updated license from SIMS Support prior to upgrading as the hash function used to generate t licenses changed between v7.6.24 and v7.7.29.
8605	7.6.23	Visit Authorizations	Corrected an issue introduced in v7.6.16 that could prevent visitor records from being added to Visit Authorization records. Corrected an issue where selecting "ves" to the edit the record after copyring prevented the visitor special accesses from being copied to the new records. Also improved performance when switching tabs in the Visit Authorization record with a large numbe
8342 8583	7.6.23 7.6.23	Visitors Visitors	of visitors.  Added Locks and Keys to the Visitor module detail report.  The 'Active' checkbox filter on the Visitor check-in transaction was not filtering terminated visitor.
8583	7.6.23	Visitors	The 'Active' checkbox filter on the Visitor check-in transaction was not filtering terminated visitor if they had a valid visit period or visit authorization.  Added a System Customization option to allow filtering of archived visitors from the web interfar
8577	7.6.23	Visitors  Documents	Added a System Customization option to allow filtering of archived visitors from the web interfa  The Internal Transfer Receipt Returned transaction was not updating the Signed for Date on the
8492		Common	document home tab unless the status was 'Transfer: In Transit'.
8083	7.6.23 7.6.23	Common	Added a new 'Print' button in Utilities / List Management to allow printing of all list data.  Added a new 'Print' button in Utilities / Special Accesses to print a list of all accesses including
8394	7.6.23	Common	umbrella accesses and which modules they apply to.  Added a warning dialog when a facility is selected and the Next Check date has been exceeded. T is a warning only and matches the behavior of SIMS v6. This message can be disabled in System
8585	7.6.23	Common	Customization for both Host and Other Facilities.  When copying Containers, Conferences, IS, DOD, and Visit Authorization records, users are now
8586	7.6.23	DoD Requests	asked if they want personnel/visitor records copied as well.  Added the 'Contract Task' field to the DoD request detail web page.
8595	7.6.23	Conferences	Corrected a rare issue that could result in an error message when selecting 'Add Predesignated Visitors' to a conference record and some of the visitors added already exist in the attendee list.
8609 8607	7.6.23 7.6.23	Visitors Visitors	Corrected an issue that could prevent visitor photos from appearing on the visitor web page.  Added 'Termination Date' to the visitors web page.
8377	7.6.23	Personnel	Corrected an issue where non-managers who are not assigned to a data group, and have the use property enabled to view SSN values, are able to view SSN values in the outputlist but not when
8589	7.6.23	Locks & Keys	the personnel record is edited.  Major performance improvement adding Key Hooks when the number of Key Hooks exceeds
8496	7.6.23	Locks & Keys	several thousand rows.  Added a System Customization option to prevent generation of Lock and Key transaction receipt
8494	7.6.23	Locks & Keys	Improved performance of Lock and Key transactions when either module contains a large numbe of rows (20k+).
8573	7.6.16	Documents	When performing a document return to accountability transaction, and one of the documents involved belongs to a different data group, and that data group had fields specified as required in
			Advanced Data Field Defaults, the required field validation was not being enforced for every data eroup.
8575	7.6.16	DoD Requests	When performing a termination report and selecting the option to identify individual visitors for termination, the 'To Date' for the request could be set to the current date even though all visitor.
8576	7.6.16	DoD Requests	on that request have not been terminated.  When performing a termination or regrade report, and the request contains a validation error su as a visitor not possessing a required special access, the correct validation error would appear an prevent the transaction from completing, but the report was still displayed. If a validation error occurs, the user is now notified that the requested regrade or termination report cannot be
8566	7.6.16	Documents	displayed due to the previous validation failure. Corrected issue with umbrella special accesses. When a parent special access was assigned to a personnel record, and child special access was assigned to a document, users may receive a validation error when assigning the personnel record as the document custodian.
8569	7.6.16	DoD Requests	When users are designated as visit request administrators for multiple data groups, the Approve and Reject buttons are now enabled/disabled when the Save button is also enabled/disabled.
7637	7.6.13	Common	The 'Change Password' icon is no longer visible when users login using LDAP / Active Directory authentication.
7826	7.6.13	Common	authentication. Added an option to force SIMS users (LDAP excluded) to change their password during the next login session. This can be set globally under Utilities / User Management / Users / Password
7981	7.6.13	Common	Settings, or individually on each User Properties dialog.  Corrected potential issue where database exceptions could prevent database audit trail records
8296	7.6.13	Common	from being created.  Corrected issue with SSN values not appearing on custom reports when SSN encryption is enable.
8301	7.6.13	Common	in the personnel or visitor modules.  Custom LDAP / Active Directory paths can now be specified for individual data groups, in additio
8394	7.6.13	Common	to specifying a global authentication path that applies to all users.  Added warning dialog when using the facility picklist to select a facility record that fails the SPP Update (Host) or Verified Date (Other) validations. This is a warning message only and the user v
	7.6.13	Common	still be allowed to select the specified facility.  All record selection picklists have been updated so that the cursor is initially placed in the first fie
8488			
8488	7.6.13	Common	in the dialog, Picklists affected are special accesses, personnel clearance cases, keys, facility addresses, destruction methods, containers, and conferences. Corrected issue upgrading from versions prior to v7.4 that could cause custom and additional reports to be removed during the upgrade process.

	8265	7.6.13	Locks & Keys	

	7.6.13	Locks & Keys	Description  Several changes were made to the Locks and Keys transactions to make them consistent with ho
		,	they operated in SIMS v6. The 'Key Destroyed' transaction now clears the 'holder' and 'issued da fields. The 'Key Lost' transaction now clears the 'issued date' field (the 'holder' field was already
			cleared). The 'Key Retrieved' transaction now clears the key holder field, marks the key as active
			and changes the status to 'not assigned'.
8366	7.6.13	Locks & Keys	Made several changes to make Locks and Keys in SIMS v7 function more like SIMS v6: (i) copying
			records no longer duplicates the history, the custodian is cleared, and the status is set to 'not assigned', (ii) loan transactions now set the issued date to the loaned date, (iii) retrieved
			transactions now change status to 'not assigned'.
8485	7.6.13	Locks & Keys	Expanded error handling when a constraint error appears in the Locks and Keys module to ident
			exactly which database relation is causing the exception.
8494 8496	7.6.13 7.6.13	Locks & Keys Locks & Keys	Improved transaction performance in the Locks and Keys modules.  Added System Customization option to suppress the receipt window that appears following a Lo
0450	7.0.13	LUCKS & Reys	or Key transaction. A PDF copy of the transaction receipt is still saved to the affected records.
			or key transaction. At or copy of the transaction receipt is still sured to the directed records.
8497	7.6.13	Locks & Keys	Users with a large number of Keys records assigned to Key Rings and Key Hooks could receive to
			many records returned during Quick Find operations.
8502	7.6.13	Locks & Keys	All transaction report dialogs are non-modal (can be minimized) with the exception of the receiption
			in the Locks and Keys modules. Lock and Key transaction receipts are now non-modal to be consistent with other modules.
8537	7.6.13	Locks & Keys	Added 'Key Holder' option to the Key Retrieved transaction dialog. If this option is not specified
			during the transaction, the key will be returned to 'not assigned' status and the key holder colur
			will be blank. If a new key holder is specified, the key will be returned to 'assigned' status and the
8538	7.6.13	Locks & Keys	new key holder assigned to the records in the transaction.  Performing a Lock Retrieved transaction prior to a Lock Loaned transaction no longer clears the
0330	7.0.13	LOCKS & REYS	Lock Holder value.
8540	7.6.13	Locks & Keys	Corrected potential exception when copying a single record in the locks module and selecting the
			option to edit the record prior to saving.
7786	7.6.13	Personnel	Added the 'Personnel Incident Report' to the personnel module. Users without access to the
8042	7.6.13	Personnel	incidents module are not allowed to execute this report from the personnel module.  Added 'Billet Type' to the special access listview on the special accesses tab of the personnel
0072	7.0.13	i ei soilliei	module input form.
8089	7.6.13	Personnel	Relabeled the 'Passport #' fields in the personnel module input form and reports to
			'Passport/Verification #' and expanded the fields to 48 characters.
8294	7.6.13	Personnel	Expanded auto numbering support for the personnel module columns: PersonnelID,
8464	7.6.13	Personnel	EmployeeNumber, and Barcode.  Added list of contracts associated with a personnel record to the read-only personnel web page
8404	7.0.13	rersonnei	Added list of contracts associated with a personnel record to the read-only personnel web page
8490	7.6.13	Personnel	The 'Edit Batch' button on the special access tab of the personnel input form failed to update th
			contract values when a user attempted to update the contract value on multiple special access
			records.
8516	7.6.13	Personnel	Modified the behavior of the 'Edit Batch' button on the Special Access tab of the personnel inpu
			form so that only one field in each special access will change per operation. The previous behav of changing multiple fields caused confusion as to which changes were being applied.
			or changing multiple neius caused confusion as to which changes were being applied.
8521	7.6.13	Personnel	Updated the personnel module Clearance Processing Metrics Report to correctly handle inverte
			dates such as the 'Brief Date' preceding the 'e-QIP Sent Date' because the personnel clearance w
0404	7.5.43		due for reinvestigation.
8481 8504	7.6.13	Personnel	Updated the personnel module Contractor Position Roster Log to use the latest format.
8489	7.6.13	SCI	Corrected exception when a personnel record assigned to a SCI request contains a null value in
	110120		ModFullName column (only affects imported data).
8515	7.6.13	Utilities	When linking SIMS accounts to LDAP / Active Directory accounts under Utilities / User
			Management, the LDAP accounts are now sorted in alphabetical order.
8273	7.6.13	Visit Authorization	Visitor records attached to a visit authorization record could appear in italics even if the visitor
8397	7.6.13	Visit	records contained no pending changes.  Added 'Add Batch' button to the visitor special access input form to provide similar functionality
		Authorization	already available in the personnel module.
8421	7.6.13	Visit	When a visit authorization record is copied, a note is added to the remarks field to indicate the
		Authorization	record was created as a copy and included the date and time of the transaction. The name of the
			SIMS user performing the copy transaction is now included in this note.
8479	7.6.13	Visit	When copying a single visit authorization record and selecting 'yes' when prompted to edit the
		Authorization	record prior to saving, visitors were not being copied to the new record. When copying a visit
			authorization the user will now receive a prompt asking if they want the visitors copied to the n
			visit authorization.

8260	Version	Component	Description  Added a new Parcedo2of0 field to the percental desument, and container modules. Provincely
	7.5.30	Common	Added a new Barcode3of9 field to the personnel, document, and container modules. Previously the barcode column was modified at print time to start and end with an asterisk (*) to ensure it
			the barcode column was modified at print time to start and end with an asterisk (*) to ensure it was readable by barcode scanners. Now the 'Barcode' field will print without asterisks and the
			'Barcode3of9' field will print with asterisks. Note that this field does not exist in the database. Bo
			are populated from the same barcode column in the database.
8301	7.5.30	Common	Added the ability to specify individual Active Directory / LDAP authentication paths on a per-use
			basis, overriding the global path specified in System Customization.
7342	7.5.30	Common	The Task Scheduler utility will now update the task list in the background to provide more up to date information on recently executed tasks.
7637	7.5.30	Common	Disabled the 'Change Password' option when LDAP authentication is enabled.
8139	7.5.30	Common	The login failure error messages have been reworded to be more user friendly.
8300	7.5.30	Personnel	Added a new personnel module report titled 'Briefed Personnel Chart' that displays a bar graph
			indicating the number of personnel briefed in one or more selected special accesses.
8201	7.5.30	Personnel	Added a 'Supervisor E-mail' field to the employment tab of the personnel module.
8105	7.5.30	Personnel	Added primary clearance polygraph fields to the personnel module outputlist.
8167 8102	7.5.30	Personnel Personnel	Added 'SF-312 Brief Date' to the personnel clearance input forms and reports.
8102	7.5.30 7.5.30	Personnel	The 'Employee Status' field is now visible on the read-only personnel web page.  Added a System Customization option to prevent terminated personnel from appearing on the
8100	7.3.30	rersonner	read-only personnel web pages. When this option is disabled, terminated personnel will appear the web page picklists but will not be selectable. When this option is enabled, terminated
8107	7.5.30	Personnel	<u>Dersonnel will not anonear</u> . The 'Show All' button on the special access tab of the personnel module input form is now enable for read-only users. This only applies if the System Customization option is enabled for 'Show Or Personnel Special Accesses That Are Briefed, Not Debriefed, and Not Denied When Opening
7622	7.5.30	Personnel	Record'.  Added an option to the JPAS discrepancy report to show personnel that are in SIMS but not in the
			JPAS spreadsheet.
7881	7.5.30	Personnel	Added a 'Certificate of Completion' field to the personnel module training records. Users can specify a path to a file that contains the actual training certification document and can access it
0210	7.5.20	DI	directly from the SIMS personnel record.
8218	7.5.30	Personnel	Clarified the text for the personnel module special access validation to read 'Personnel Special Access XYZ requires personnel to be a U.S. Citizen'.
8132	7.5.30	Personnel	Debriefed, non-briefed, and denied special accesses are no longer displayed on the read-only personnel web page.
7495	7.5.30	Personnel	Modified the JPAS import transaction dialog to remove the extra summary dialog that appears a
7805	7.5.30	Personnel	the end of the import transaction.  Depending on a user's access right to JPAS, the exported Excel file could have 'Yes' for a SCI access.
. 200	5.50	. 5.30.11161	they are not cleared to see. The JPAS import transaction will now ignore this value instead of
			treating it as a special access name.
8099	7.5.30	Visitors	Added the ability to exclude certain user from the validation 'Display Warning When Visitor Has
			Visited More Than X Times in Y Days'. This option can be found in the List Management utility in
8137	7.5.30	Visitors	the Visitors / Visitor Type section.  Added a new User Management property to allow users read-only access to the visitor module,
013/	7.3.30	VISILUIS	but read-write access to the visitor check-in/check-out transactions.
8302	7.5.30	Visitors	Added the visitor badge information to the visitor read-only web page.
7778	7.5.30	Documents	Added a new 'Scan Barcodes' option to the document module transaction dialog. This allows us
			to rapidly scan document barcodes to identify documents for a transaction. Previously the user
			had to wait for each document to be located by the system before the next barcode could be
			scanned. This new option is on the right side of the transaction dialog below the 'Make Scanset'
7879	7.5.30	Documents	and 'Load Scanset' buttons.  Added a 'Change Project' option to the document module contract transfer transaction.
8049	7.5.30	DoD Requests	Added a new 'JPAS Visit' checkbox and 'SMO Code' textbox to the OVR input webpage. When JP
			Visit is checked, the facility selection controls are disabled and the user is prompted to provide a SMO code. The 'Send to FAX' field is also disabled. On the Windows client, checking 'JPAS Visit' of the home tab will disable the 'Send to Facilities' tab and allow the user to enter a SMO code. The is also a new report format for JPAS visits that displays the SMO code instead of destination facilinformation.
7860	7.5.30	DoD Requests	Added a new validation labeled 'Require All Visitors to have a Clearance Level >= Request Classification Level'. When enabled, all facilities listed under the 'Sent To Facilities' tab must hav facility clearance level equal to or greater than the classification level assigned to the visit reque
7755	7.5.30	DoD Requests	Added option to System Customization to allow the assignment of a default classification level t visit requests submitted through the unclassified OVR input web page. If no value is specified, the system will default to 'unclassified'.
8026	7.5.30	DoD Requests	The Request Status fields built into the DoD module list management (approved, archived, pend rejected, transmitted) can no longer be edited. This is required so that when a visit request is transmitted via FAX or e-mail, the correct status value will be available. Users can still add
0200	75.00	Cc-+ :	additional status values.
8209 8298	7.5.30 7.5.30	Contracts Contracts	Added a 'DD254 Subcontractor Listing by Facility' report to the contracts module.  Added the Performing Facility Addresses to the contract module detail report.
8000	7.5.30	Contracts	The DD254 listview in the contract module input form has been expanded to allow two lines for
	5.50		each DD254. This allows the subcontractor name and ID to appear in the listview. Previously use
			had to open each DD254 record to see the subcontractor information.
8225	7.5.30	Contracts	Changed the Contract End Date validations to include Closed Out criteria. Instead of only verifyi that the contract end date has not passed, the validations will also check to see if the contract h
0443			that the contract end date has not passed, the validations will also check to see if the contract h
			been closed out.
8355	7.5.30	Contracts	been closed out.  Added the 'Contract Type' field to the read-only contract web page.
8355 7779	7.5.30	Facilities	been closed out. Added the 'Contract Type' field to the read-only contract web page. Added the 'Convenience Code' field to the facility Quick Find and Query Editor tools.

7899	7.4.15	Import	request via FAX or e-mail.  Added ability to use SQL tables as an import data source in addition to text, Excel, and Access files.
8073	7.4.15	IS	Added new System Customization option for 'Require unique values for hardware serial numbers'. Unique barcodes are required to perform barcode inventories, and previously this check could not be disabled if users did not perform barcode inventories and wanted to create duplicate values.
6479	7.4.15	Personnel	Added a 'Cancel' button when prompted for a clearance action related to a personnel clearance change.
6959	7.4.15	Personnel	Added a major new Personnel Clearance Processing Metrics report that allows tracking of initial and periodic clearance investigations. Statistics are generated showing the processing duration by clearance level, data group, and initial vs. periodic investigation. A training video has been added to explain the new functionality.
7966	7.4.15	Personnel	Added a new 'All SA' column to the Personnel module outputlist and Quick Reports. This field lists all the assigned personnel special accesses where no brief date is required. If a brief date is required, the access name is displayed only if the briefing date is equal to or less than the current date, and there is either no debrief date or the debrief date is in the future.
8066	7.4.15	Personnel	Added 'Access Ceased Date', 'Access Level', and 'Authority' fields to the contract entry dialog and ListView in the personnel module.
8145	7.4.15	Personnel	The Personnel Clearance Task List now displays the sequence number in the first column of the ListView. This makes it easier to determine the sort order.
7618	7.4.15	SCI	Added 'Through' checkbox for facilities assigned to SCI Outgoing Requests, similar to the capability already found in the DoD request module.
7970	7.4.15	Workflow	Added new System Customization option to allow users to modify the regular expression used to determine if an e-mail address is will. This prevents the workflow service from failing when invalid from/to addresses are specified.
8122	7.4.15	Visitors	Added several new fields to Visitor special accesses: billet type, billet title, grant date, brief date, next brief date, debrief date, rebrief date, and denied date.
8235	7.4.15	Workflow	Corrected issue that caused the SIMS Workflow Service to appear multiple times under Add- Remove Programs.
8227	7.4.15	Conferences	The conference attendee sign in sheet, attendee list, and scanned list reports displayed the visitor ID instead of SSN even though a user with SSN visibility indicated SSN should appear instead of visitor ID.
8054	7.4.15	Web	Users who access the OVR web pages using the authentication bypass feature were being redirected to the login page when their session timed out. Users are now redirected to the OVR home page when a timeout occurs.
8251	7.4.15	Locks and Keys	Performing a lock or key module transaction with multiple rows highlighted in the output list only updated the first record selected.
8142	7.4.15	Facilities	Users who remove or rename the 'OTHER' facility address type in List Management could receive an error message when trying to add other address records to facilities.
8272	7.4.15	Web	Added code to the detail web pages to prevent records from being cached by the browser.
8219	7.4.15	Common	Non-managers granted access to individual utility modules were unable to change the data group assignments on utility records if the user was not assigned to a data group.
6491	7.4.15	Common	Consolidated the rules used to determine which report overrides and additional reports a submanager is allowed to create. Full managers can create and modify reports in any data group. Submanagers not assigned to a data group can create and modify reports in any data group. Submanagers assigned to a data group can only create and edit reports in their own hierarchical
7637	7.4.15	Common	group. The 'Change Password' icon on the main screen is no longer active if the system is using LDAP or
7812	7.4.15	Common	Active Directory authentication.  Expanded the sort functionality in Quick Reports to allow sorting in any direction using any combination of columns.
7981	7.4.15	Common	Corrected issue where imported data could prevent database audit trail entries from being displayed correctly.
7990	7.4.15	Common	Records in the Personnel module are only considered inactive if the termination date specified is the current date or in the past. This means that Personnel with a future termination date could be selected using the personnel picklist, but the parent record could not be saved due to a validation message indicating the record is inactive. The validation has been made to be consistent with the standard Personnel module rules that personnel with a future termination date can still be selected using the picklist.
8030	7.4.15	Common	Corrected import related issue where empty values stored in the DefaultTransactionValues table could cause errors when performing a Document External Transfer.
8061	7.4.15	Common	When copying newly added records, the outputlist was not always refreshed to show the copied records.
8119	7.4.15	Common	Trecords.  Corrected issue that could prevent modifications to the Module Group access list from being applied to users already assigned to the group.
8125	7.4.15	Common	Corrected issue where the SSN field was not available in the personnel or visitor outputlists if SQL encryption was enabled.
8179	7.4.15	Common	Moved the visitor SSN column from the Query Editor in DoD, DoE, and SCI modules and placed it on the Quick Find tab. This allows users to more easily search for visitors on requests based on the level of SSN visibility assigned to their account.
8078	7.4.15	Conferences	Corrected the way barcodes are generated for personnel and visitors when added to a conference attacked list. If the record selected does not already have a barcode assigned, a new one will be generated. If a conflict exists with another attendee in the same conference, a new unique value
7794	7.4.15	Contracts	will be generated.  Corrected the margins on page 2 of the DoD and NSA DD254 forms to more closely match the
8129	7.4.15	Contracts	government issued versions.  Corrected an issue where the contract prime facility listed on a contract was appearing as the
7854	7.4.15	Documents	default value on new DD254 records.  The Document Numbering Utility module was opening slowly if more than several hundred
7874	7.4.15	Documents	streams were defined.  Corrected issue with the document undestroy transaction that prevented users from quickly redestroying selected documents involved in the most recent undestroy transaction.
8016	7.4.15	Documents	Corrected the ability to override the Document External Transfer Receipt report.
8121	7.4.15	Documents	Corrected sorting issue on the Document module Transaction Reprints dialog that could cause the same document to appear multiple times.
8176 6932	7.4.15 7.4.15	Documents Facilities	The document transaction default for 'From Facility' was being used for all transactions but it should not have been applied to the Return to Accountability transaction.  When 'Government Facility' is checked on the home tab of a facility record, the Granted Date, SPP
	1		Update Date, FOCI checkbox, Next Check Date, and Cog Office fields are now disabled.
7423	7.4.15	Incidents Personnel	The 'Filter Inactive' checkbox on the Incidents module outputlist was not filtering incidents closed the previous day.  Corrected issue on the Citizenship tab of the Personnel module where Dual Citizenship and Foreign
			Person values were still saved to the database after US Citizenship was indicated. Those areas are now cleared and disabled for US Citizens.
7472	7.4.15	Personnel	Corrected exception when querying on Citizenship Country using the Query Editor.

	7.4.15	Personnel	Corrected issue with Contractor Position Roster Log report that could prevent all data from being
8120	7.4.15	Personnel	displayed in a readable format. The 'Enterprise Wide' default in Outputlist Customization was not being saved for each user.
8140	7.4.15	Personnel	Expanded the width of the 'Year' field on the personnel vehicle input form so that the last digit is
8126	7.4.15	Personnel	not cropped.  Corrected issue that prevented required field checks from being enforced on personnel clearance
8108	7.4.15	Visitors	records.  Corrected potential exception in the autonumbering module when saving a visitor record after
8111			changing the Visit Occurrence Time Out date.
	7.4.15	Visitors	Removed invalid Query Editor option that could generate an exception when searching for Host Facilities.
8052	7.4.15	Workflow	Corrected exception when sending the Personnel module detail report from the Task Scheduler.
8110	7.4.15	Workflow	Excluded FAX addresses from the e-mail address validations when sending DoD visit requests, termination/regrade reports, and visit request approval/rejection notices.
7952	7.3.63	DoD Requests	Added option to System Customization to allow suppression of archived contract and facility records when using the picklists on the OVR input form in the web interface.
7896	7.3.63	DoD Requests	Added System Customization option to include the visit request number on the e-mail or FAX
8044	7.3.63	DoD Requests	subject line when transmitting a visit request.  Added System Customization option to specify the maximum number of records allowed when
7087	7.3.63	DoD Requests	performing Termination and Regrade Letters. This prevents users from accidently terminating or regrading visitors across the entire module.  Added e-mail capability to the DoD Termination and Regrade Letters.
7925	7.3.63	DoD/DoE	Added support for selecting Visitors in addition to Personnel records when populating a DoD or
8043	7.3.63	Requests Contracts	DoE visit request.  Added 'Program Name' to the Contract module Quick Find dialog.
8050	7.3.63	Personnel	Added the ability to display the remarks column on the personnel detail web page. This value does not appear on the detail page by default. The web page must be modified in order to display the
7926	7.3.63	Visitors	value.  Replaced the JPASVerifiedOn (date) and JPASVerified (bit) fields in Visitors with the more generic
			ClearanceVerifyDate (date) and ClearanceVerifyMethod (list). If JPASVerified was checked prior to upgrade, ClearanceVerifyMethod will be set to 'JPAS'. The date stored in JPASVerifiedOn will be moved to ClearanceVerifyDate. Additional clearance verification methods can be defined by the
7772	7.3.63	Common	user under Utilities / List Management. Added support for specifying sort column and sort order for Document and IS module barcode
7901	7.3.63	Common	inventory reports.  Added support for SSL encryption of SMTP connections. Also added option to enable/disable SMTP
8085	7.3.63	Common	authentication requirement.  Added ability to send DoD approval and rejection notifications through the workflow service. This uses the same System Customization setting that determines whether or not DoD requests and
7638	7.3.63	Common	term/regrade letters are sent through the workflow service.  Outputlist toolbar icons now work properly when more than one module is opened. Previously,
			opening multiple modules and switching back and forth could cause the toolbar icons to become unresponsive.
7362	7.3.63	Common	Updated behavior of the Basic Data Field Defaults utility module to have 'Apply to Archived' box checked automatically whenever 'Document Return to Accountability New Custodian' is checked.
7383	7.3.63	Common	The Facility link in PersonnelSAs was not available for queries in the Personnel module Query Editor interface.
8071	7.3.63	Common	Corrected error that could appear when a manager who is not assigned to a data group attempts to add records to List Management.
8074	7.3.63	Common	Corrected issue that could allow the same counter in an auto-numbering stream to be placed on
8051	7.3.63	Common	the recycle queue more than once.  Corrected code used to detect duplicate barcode values to ensure that duplicate warnings appear
8028	7.3.63	Visitors	in a standard dialog box instead of an error dialog box.  Corrected synchronization issue between the "US Citizen' checkbox and the 'Citizenship Country' field in the Visitors module. In certain scenarios, these two fields could become unsynchronized causing the 'US Citizen' box to be unchecked. This only impacts users of earlier v7.3.x releases.
8064	7.3.63	Visit	Users running v7.2.x or earlier are unaffected.  Corrected issue when copying Visit Authorization records and one or more copies violates a
		Authorizations	custom unique constraint (i.e., IX_VisAuthNumber). The unique record warning will now appear in a standard validation dialog instead of an error dialog.
8063			
	7.3.63	Installer	
8058	7.3.63 7.3.63	Installer Personnel	now ignored during the upgrade process.  Corrected an issue that prevented users from sending DoD visit requests via FAX if the 'Send e-mai & FAX requests from server' option is enabled in System Customization / OVR E-mail & FAX. E-mail
			now ignored during the upgrade process.  Corrected an issue that prevented users from sending DoD visit requests via FAX if the 'Send e-mai

Corrected issue when upgrading from v7.2.x to v7.3.x that could prevent the new IS module lists from appearing in Utilities / List Management.  Corrected issue that could allow users with read-only access to the personnel module to modify clearance records. An audit trail entry is always created. After upgrading, execute the stored procedure usp VerifyClearanceAuditfrail to identify any occurrence.  Corrected issue performing document barcode inventory when the barcode value exceeded 15 characters.  In v7.3.41, the DoD request visitor override for U.S. Citizen and Authorized Courier settings was changed from a two-state checkbox to a three-state checkbox. Due to this change, previous overrides of the U.S. Citizens jand Authorized Courier setting ould cause the U.S. Citizen and Authorized Courier and U.S. Citizen. This issue is now corrected upon upgrading to v7.3.46. Users who have not yet upgraded to a v7.3.x release will not experience this issue.  Previously when a facility was selected on the home tab of the DoD Request input form, the contact phone & FAX information displayed on the form was not always showing the value associated with facility primary address. The correct values from the primary address will now appear on the DoD Request home tab.  In rare cases, the IS module barcode inventory could generate an error indicating that the AlSearcodeInventory report c

Tishee	Manaian	Comment	Description
Ticket 7969	Version 7.3.43	Component Documents	Corrected performance issue when selecting document records for transactions in extremely large
7970	7.3.43	Workflow	databases.  Workflow service now performs additional error checking on destination e-mail addresses before
			submitting the message to the mail server.
7976 7978	7.3.43 7.3.43	Installer Facilities	Corrected potential upgrade error while processing the DefaultTransactionValues table.  Users could receive an error when copying single facility records and selecting the option to edit
			the record before saving.
N/A	7.3.41	Common	Client, server and standalone machines must have the .NET Framework v3.5 SP1 or later. Most machines will already have this version of the framework installed by the Windows Update component. You can retrieve the installer for .NET v3.5 SP1 from the SIMS website.
6477	7.3.41	Common	Added a significant new auditing capability to all modules. This allows managers to view every change down to the column level, including old and new values. Audit data can be accessed from the input form of a particular record or from the Utilities module.
6432	7.3.41	AIS/IS	Major changes to the AIS module, which has now been renamed to 'IS' module to be consistent with the latest NISPOM terminology. Added many new fields, several new reports, transactions, and validations have been added.
6726	7.3.41	Utilities	Added the ability to mark users as archived under Utilities / User Management.
6867	7.3.41	Documents	Added the ability to select custom headers for the transaction receipt when performing an extern transfer in the document module.
6947	7.3.41	SCI Requests	Added capability to override special accesses and access types for visitors on SCI requests.
7005	7.3.41	Forms	Personnel clearance audit trail now contains an entry when that person is selected on a PAR form
7024	7.3.41	Visitors	Added Visit Record Report to the Visitors module. This report was originally in SIMS v6 but was
			never moved over to SIMS v7.
7089	7.3.41	DoD Requests	Added a print time option to the DoD request report to control visibility of special access information. Users now have the option of printing all specified special accesses, no special
7111	7.3.41	Personnel	accesses, or only those accesses required by the request.  Added option to print all contracts in the 'Historical Program Listing' report instead of requiring the
			user to specify a contract.
7121	7.3.41	Common	Added new option in User Management to grant users the right to modify the data group on records without requiring administrator privileges.
7251	7.3.41	Documents	Added System Customization option to ignore duplicate values when performing a document
7375	7.3.41	DoD/DoE	barcode inventory.  Changed the US Citizenship and Courier Authorization overrides for DoD & DoE requests from tw
,3,3	7.3.41	Requests	state to three-state checkboxes. This allows greater flexibility when specifying override values for
7430	7.3.41	Installer	visitors.  Updated the process used to perform SQL database upgrades. Users can now provide an XML list
7471	7.3.41	Visitors	of custom database objects to be ignored during the synchronization process.  Added System Customization option to notify user during a check-in transaction if the visitor has
7490	7.3.41	DoD Requests	visited more than X times in the last Y days.  DoD Request module summary report now includes request number, from and to dates, from
			facility ID, to facility ID, and contract number.
7516	7.3.41	Personnel	Added new Personnel module transaction that allows multiple training records to be assigned to multiple personnel in a single operation.
7525	7.3.41	Personnel	Added DoE and SCI visit requests to the personnel detail and termination reports.
7527	7.3.41	Personnel / Visitors	Added custom report option to filter personnel and visitor images when retrieving data. This can significantly improve performance when reporting on a large number of records and the photo is
7531	7.3.41	Personnel	not required.  Added new 'sponsor' column to the personnel special access listview.
7565	7.3.41	Documents	Added new System Customization option to restrict changing of container, custodian and contract fields when editing a document record. When enabled, these values can only be changed when adding a new record. Additional changes to these fields must be performed by a transaction.
7591	7.3.41	Documents	Added new System Customization option to automatically print a document detail report after saving a new document record.
7598 7614	7.3.41 7.3.41	Documents Documents	Expanded the label generation wizard to document external transfer shipping labels.  Added new document module Transaction Default to mark documents accountable when
7615	7.3.41	Personnel	performing a return to accountability transaction.  Added new report to calculate the average number of days required to complete a set of personn
7540	7044		clearance tasks.
7619 7639	7.3.41 7.3.41	Personnel Common	Added a three-state termination checkbox to the personnel module Quick Find dialog.  Added new System Customization option to prompt users before automatically logging them out
7650	7.3.41	Facilities	of the system due to inactivity.  Expanded the search fields on the facility picklist to include name, ID, address, and convenience
			code.
7710	7.3.41	Documents	Added print time option to the document module random audit transaction to print document titles on the audit report.
7712 7748	7.3.41 7.3.41	Documents Web	Added a print time option to group document barcode inventory report by custodian.  Added a new web.config option to suppress the domain control on the web interface login page.
7752	7.3.41	Personnel	Added User Management option to designate which non-manager users are allowed to perform JPAS import transactions.
7758	7.3.41 7.3.41	Common	Added support for barcode inventory using the SocketMobile scanner.
7799 7816	7.3.41	Documents Containers	Added the ability to override the barcode inventory reports.  Added the ability to override the Container Access List report.
7845	7.3.41	Common	Added option to Quick Report label wizard to allow specifying the start position when printing a
7850	7.3.41	Personnel	sheet of labels.  Added the 'SA Billet' field to the PersonnelSAs table in the personnel module Quick Reports.
7855	7.3.41	Visitors	Added the ability to override the Visitor Badge Report.
7858	7.3.41	Common	Major reporting component upgrade from ActiveReports v3 to v6.
7861	7.3.41	Common	The recently added Custom Report Header capability has been expanded to the DoD & DoE requiand termination and regrade reports.
7885	7.3.41	Workflow	Added the ability to send HTML e-mails from the Task Scheduler.
6799 6826	7.3.41 7.3.41	Personnel Personnel	The 'Personnel Count by SA' report no longer prints two blank pages at the end.  The personnel module detail report displayed 'From Facility' information under the visit request
		Utilities	section instead of 'Send To Facility'.  Editing an existing custom report override in Utilities / Custom Reports caused the current user's
6861	7.3.41		data group to override the data group originally assigned to the record.
6982 6984	7.3.41 7.3.41	Forms Common	Archived records in the PAR Forms module are now displayed in red.  Required field validations involving the SSN field are no longer enforced for users who cannot vie
	7.3.41		SSN data.
7237		Common	All modules now consistently display the same tab when adding multiple records in a loop.
7359	7.3.41	Workflow	Corrected issue where some reports did not work correctly when generated with the Task Scheduler.
7398	7.3.41	Personnel	Corrected issue with how the Rate and Investigation Cost fields are calculated when modifying a
7467	7.3.41	Personnel	Personnel record.  Added the following fields to the personnel module Quick Reports for the PersonnelContracts table: Contract ID, Prime Contract ID, Contract Description, Facility ID, Clearance Level, Storage
7468	7.3.41	Visitors	Level, Program Manager, End Date.  Corrected issue with visitor module Visitor Log report where the option to use only records
	7.3.41	Documents	currently displayed in the outputlist instead used all records available.  Documents with a classification level with 'require witness' enabled could be destroyed without a
7475			

Ticket	Version	Component	Description
7526	7.3.41	Visitors	The list of visitors in the Visitor module check-in transaction is now sorted by visitor name.
7532	7.3.41	Facilities	Required field validations are no longer performed on fields disabled by checking the 'Government'
7623	7.3.41	Personnel	Facility' option.  The Assigned and Expected dates for personnel clearance tasks are now automatically calculated based on the completion date of the previous task.
7645	7.3.41	Visitors	Corrected issue with the visitor detail report where extremely long 'position' or 'visitor type' value
7647	7.3.41	Visitors	would not correctly wrap to a second line.  The Visitor Badges Not Returned report is now sorted by visitor name.
7660	7.3.41	Common	The fields in Quick Reports are not always cleared when changing the source table. Failure to remove the old fields could generate 'error 8' on the report.
7720	7.3.41	Documents	The document external transfer transaction now requires the user to specify the dispatch and suspense dates instead of assigning a value automatically.
7728	7.3.41	Visitors	Checking the U.S. Citizen option on the visitor module home tab will now display as 'United States in the output list.
7743	7.3.41	Common	Corrected issue with custom report overrides where the 'UserData' property listing required table was not passed to the reporting engine.
7745	7.3.41	Common	Corrected issue with saved label wizard layouts not loading correctly.
7746	7.3.41	Workflow	Corrected issue where saved queries could not be loaded into the Task Scheduler.
7747	7.3.41	Personnel	Corrected 'Personnel by SA' report display issue when used as a report override.
7749	7.3.41	DoD Requests	The System Customization option for the DoD request module to clear special access information when creating a new request was not taking effect.
7776	7.3.41	Visitors	When performing a visitor check-in transaction, the 'JPAS Verified On' date supplied during the transaction was not used to update the value on the visitor home tab.
7792	7.3.41	Facilities	Corrected issue in the standalone version where setting the option to require a unique facility ID based on clearance rank was not appearing in the correct style of window.
7800	7.3.41	Documents	A document module record that has been externally transferred multiple times, and has had a return receipt processed for the most recent external transfer, could generate an incorrect tracer letter based on the first external transfer that was not associated with a return receipt.
7801	7.3.41	Common	Transaction defaults were not being applied unless a data group was specified.
7807	7.3.41	Documents	Corrected issue when performing a document module retention transaction where the 'retention authorized until' date was being set regardless of whether or not the date checkbox was enabled.
7809	7.3.41	Import	Corrected an out of memory issue with the Import Engine when performing a link check on an extremely large number of documents.
7829	7.3.41	Personnel	The personnel document accountability report could repeat special access information in certain situations.
7833	7.3.41	Locks & Keys	When adding a new key to a lock record, the key information did not always appear until the lock record was saved and opened.
7834	7.3.41	Web	When a user exits or logs out of the OVR web page, the user is now returned to the OVR webpage instead of the main web login page.
7835	7.3.41	Common	An exception could occur when adding a new special access billet title entry under List Management.
7838	7.3.41	Facilities	The option to require a unique facility ID based on clearance rank was not enforced when copying a facility record and selecting the option to skip editing the new record.
7846	7.3.41	Import	Corrected a problem with the Import Engine when importing personnel records that reference facility records that already exist in the database. The facility information was not imported unless
7847	7.3.41	Conferences	the user selects the option to create missing links.  The conference module detail report was not displaying the primary clearance level for personnel attendees.
7848	7.3.41	Locks & Keys	attendees.  When performing a transaction in the Locks module on multiple records only the first record selected is modified with a new audit trail entry.
7852	7.3.41	Documents	The document external transfer, destruction, and return to accountability transactions now use the Mark document unaccountable option on the transaction screen to determine if the document should be marked accountable after the transaction is completed.
7856	7.3.41	Visitors	Some of the temporary data columns were not populated when building a custom report in the
7869	7.3.41	Import	visitor module.  Import Engine now correctly handles importing personnel who have multiple clearances marked a
7882	7.3.41	Common	primary.  In rare cases, closing the report status window while a report is being generated in the backgroun
7890	7.3.41	Visitors	could generate an exception.  Corrected cosmetic issue in the visitor module detail report.
7893	7.3.41	Documents	Deforming a return receipt transaction for a document external transfer now checks the document audit trail to make sure the return receipt is for the most recent external transfer of the document before updating the document status and return receipt date. If it is not the most recent external transfer for that document, only the audit trail entry is updated with the return receipt date.
7894	7.3.41	Personnel	The personnel module Quick Find always combined fields on the clearance tab using the AND operator even if OR was selected at the bottom of the dialog.
7946	7.3.41	Import	The import engine was not importing the Test Date field for Clearance Case / Applications / Polygraph #2.
