

NEED FUNCTIONAL OR TECHNICAL HELP WITH YOUR SIMS?

Are you finding it challenging to maintain your security program while keeping up with changing government requirements?

Are you required to sustain your work volume (or produce more) with reduced staffing resources?

SIMS SOFTWARE'S MANAGED SERVICES PROFESSIONALS CAN HELP

SIMS Software's Managed Services staff works with our customers to make sure they are receiving the maximum return on their SIMS investment. We provide managed migration services for new customers to migrate their current security records into SIMS and managed services for current customers to merge multiple SIMS databases into one corporate-wide database. We provide managed onsite SIMS upgrades as well as in depth reviews and evaluations of customer security programs and their SIMS data in order to suggest optimal usage of the resources that the SIMS program provides.

WHO WE ARE.

- Experienced FSOs, CPSOs and Security Managers
- SQL Engineers and Software Developers
- Program Managers and SIMS trainers

WHAT WE CAN DO FOR YOU.

- **Upgrades:** A member of our technical support staff can come to your site to perform upgrades of your SIMS to make sure you are at the most current version and utilizing the latest features.
- **Migration Management:** SIMS Software can manage some or all aspects of migration planning and scripting, and SIMS system setup and cutover planning for new customers, or current customers migrating multiple SIMS data bases into a central corporate database.
- **Evaluations:** A seasoned security professional and SIMS expert can meet with you to review your security program requirements and suggest opportunities to help you get the optimal usage of the resources the SIMS program provides. Based on need, we coordinate scripts and reports with our developers and help you run or schedule scripts and add custom reports.
- **Inspection Preparation:** A seasoned security professional and SIMS expert can help you prepare for security reviews. We can assist with SIMS setup, organization, cleanup and can help you generate reports and documentation for your review.

TRUSTED AND RELIABLE.

SIMS Software has a long-standing history of supporting the defense industry and has been a pioneer in automating industrial security information management since 1983. We are the recognized leader in the field, providing the U.S. Government and defense contractors with innovative solutions and systems. Call or email today to learn how we can help you.
